

Strowger Inventory App

A smartphone app to capture
and inventory loop extenders
(and maybe other products
too)

Main cell phone screen

The image displays two screenshots of a mobile application interface for 'Strowger'. The left screenshot shows a form with fields for 'Ticket (optional)', 'Location ID (optional)', and 'Customer Assignments (optional)'. A callout box points to the top of the screen, stating 'Automatic location of s/n'. The right screenshot shows the same form after a barcode scan, with a callout box pointing to the scanned barcode, stating 'Camera scans bar code serial numbers'. The right screenshot also shows the 'Serial: 6901028015417' and 'GPS: 39.91815605 116.69264917' information. A callout box points to the 'Ticket Number' field, stating 'Ticket Number Freeform text optional'. Another callout box points to the 'Location ID' field, stating 'Location ID Freeform text optional'. A third callout box points to the 'Customer Assignments' field, stating 'Customer Assignments Freeform text optional'. A final callout box at the bottom points to the 'Send' button, stating 'Send email to distribution list. Save in a spreadsheet on this phone'.

Notes

Remember, smart phones have good voice recognition capabilities. You don't have to enter text, you could easily dictate your results.

Make sure you press send before you leave the location. The app will record the GPS of the location where the send button was pressed.

Did we mention that the app is free?
